

# DRY LAND EXERCISES FOR SWIMMERS

**When:** These exercises are the perfect WARM UP to be performed before swimming training.

- Prepare for training physically – by increasing muscle blood flow and activating the nervous system, both of which will assist in injury prevention.
- Prepare for training mentally – by getting the swimmers to focus on training with commitment and preparing to train well.
- Part of your long term physical development.

**How:** Each sequence has exercises of increasing difficulty, exercise from each sequence for a full routine. Start with 10 repetitions for each exercise, increasing in increments of 2 over time, to a maximum of 20. (For the Front and side plank start with a hold of 30 seconds increasing by 10 seconds until can hold for a minute). Only progress onto the more difficult exercises once mastering the easier levels. Most importantly, perform the exercise well and without discomfort.

**Where:** The aim of the program is that it is easy for coaches to implement, and is designed to be performed on pool-deck with minimal equipment.

**Who:** The exercises included have been selected for their simplicity and safety so can be performed by all swimmers, from as young as 10. While junior swimmers may make some strength gains using this program, the focus is on skill acquisition rather than aiming for gross strength changes, which may be developed once the swimmer is more mature.

BEGINNER | INTERMEDIATE | ADVANCED

<b>1</b> Skipping 5-10 mins	<b>2</b> Half squats	<b>3</b> Full squats	<b>4</b> Jump squats to streamline	<b>5</b> 2 arm push	<b>6</b> Single arm punch	<b>7</b> Internal rotation punch	
<ul style="list-style-type: none"> <li>• stand with feet shoulder width apart</li> <li>• keep arms out in front, a tall back and weight on the heels</li> <li>• squat down till thighs are horizontal</li> </ul>		<ul style="list-style-type: none"> <li>• stand with feet shoulder width apart</li> <li>• keep arms out in front, a tall back and weight on the heels</li> <li>• squat down as far as you can maintaining a strong back position</li> </ul>		<ul style="list-style-type: none"> <li>• stand with feet shoulder width apart</li> <li>• keep arms out in front, a tall back and weight on the heels</li> <li>• squat down till thighs are horizontal and explode up, as jumping up push the arms into streamline</li> </ul>		<ul style="list-style-type: none"> <li>• affix band securely at about shoulder height</li> <li>• stand with feet in split stance with opposite foot to pulling arm forward</li> <li>• pull one arm back to level with the body</li> <li>• perform a small amount of body rotation in combination with the row</li> </ul>	
<ul style="list-style-type: none"> <li>• affix band securely at about shoulder height</li> <li>• step away to tension band with hands at shoulder level</li> <li>• pull arms back from fully extended position to elbows at 90° keeping a strong pelvis/core position</li> </ul>		<ul style="list-style-type: none"> <li>• affix band securely at about shoulder height</li> <li>• stand with feet in split stance with opposite foot to pulling arm forward</li> <li>• pull one arm back to level with the body</li> <li>• perform a small amount of body rotation in combination with the row</li> </ul>		<ul style="list-style-type: none"> <li>• affix band securely at about shoulder height</li> <li>• stand with feet in split stance and strong pelvis/core position</li> <li>• press both arms forward to full extension</li> <li>• perform a small amount of body rotation in combination with the punch</li> </ul>		<ul style="list-style-type: none"> <li>• affix band securely at about shoulder height</li> <li>• stand with feet in split stance with opposite foot to punching arm forward</li> <li>• press one arm forward to full extension then return arm to level with the body</li> <li>• perform a small amount of body rotation in combination with the punch</li> </ul>	
<b>4</b> 2 arm rows		Single arm rows		Single arm rows to external rotation		<b>5</b> Front plank	
<ul style="list-style-type: none"> <li>• affix band securely at about shoulder height</li> <li>• pull arms back from fully extended position to elbows at 90° keeping a strong pelvis/core position</li> </ul>		<ul style="list-style-type: none"> <li>• affix band securely at about shoulder height</li> <li>• stand with feet in split stance with opposite foot to pulling arm forward</li> <li>• pull one arm back to level with the body</li> <li>• perform a small amount of body rotation in combination with the row</li> </ul>		<ul style="list-style-type: none"> <li>• affix band securely at about shoulder height</li> <li>• stand with feet in split stance and strong pelvis/core position</li> <li>• press both arms forward to full extension</li> <li>• perform a small amount of body rotation in combination with the punch</li> </ul>		Side plank	
						Front to side	
<b>6</b> Initial prone retractions		W Y T		Abduct to streamline		Dead bug	
<ul style="list-style-type: none"> <li>• lay prone with arms by the sides</li> <li>• lift the shoulders and arms off the ground by pulling the shoulder blades back toward each other</li> <li>• keep the head and neck in neutral position in line with the body</li> </ul>		<ul style="list-style-type: none"> <li>• lay prone with shoulder blades drawn back toward each other, head and neck in neutral position</li> <li>• lift the arms out to 90° then draw the elbows down to make a W shape; then move the hands to above the head to make a Y shape</li> <li>• lower the arms to 90° making a T shape again and repeat</li> </ul>		<ul style="list-style-type: none"> <li>• lay prone with shoulder blades drawn back toward each other, arms by the side, and head and neck in neutral position</li> <li>• lift the arms out to the side, facing the sky and elbows straight; slowly abduct the arms keeping them just off the ground, to a streamline position with palms facing the ground</li> <li>• slowly lower the arms to the side again maintaining good scapular position</li> </ul>		<ul style="list-style-type: none"> <li>• while facing to one side abduct the arm with elbow flexed to 90°, and have the forearm on the ground</li> <li>• come up onto the toes</li> <li>• hold this position maintaining good shoulder blade position and a flat body, with head and neck in neutral position in line with the body</li> </ul>	
						Supine trunk rotation	
<b>7</b> Alternate crunches						Knee push-ups	
						<ul style="list-style-type: none"> <li>• begin in supine with arms 45 degrees out to the side</li> <li>• lift the hip and knees up to a 90/90 position</li> <li>• lower your legs to the right halfway to the floor</li> <li>• rotate back to the middle and then over to the left</li> </ul>	
						Full push-ups	
						<ul style="list-style-type: none"> <li>• lay prone with the hands on the ground at shoulder height</li> <li>• lift up with weight on the toes of only one leg</li> <li>• keep the upper body straight and strong</li> <li>• lower down so upper arms parallel with the ground</li> <li>• return to the start position</li> <li>• repeat moving the opposite elbow and knee toward each other</li> </ul>	
<b>8</b> Lunges		Lunge with streamline		Lunge with rotation		Push-ups one leg	
<ul style="list-style-type: none"> <li>• stance lunge into a step forward</li> <li>• bring foot onto the forward knee</li> <li>• bring the back knee to the ground</li> <li>• return to stand</li> <li>• repeat on the other side</li> </ul>		<ul style="list-style-type: none"> <li>• same lunge as previously</li> <li>• as you step forward then drop together or as you step forward then rotate your upper body towards the front leg side while keeping your hips facing the front</li> </ul>		<ul style="list-style-type: none"> <li>• same lunge as previously</li> <li>• as you step forward then drop together or as you step forward then rotate your upper body towards the front leg side while keeping your hips facing the front</li> </ul>		<ul style="list-style-type: none"> <li>• lay prone with the hands on the ground at shoulder height</li> <li>• lift up with weight on the toes of only one leg</li> <li>• keep the upper body straight and strong</li> <li>• lower down so upper arms parallel with the ground</li> <li>• return to the start position</li> <li>• repeat moving the opposite elbow and knee toward each other</li> </ul>	
						Knee to chest	
<b>9</b> Supermans		Alternate supermans		Bird dog		Cow to cat	
<ul style="list-style-type: none"> <li>• begin prone with arms extended above the head, head in neutral and legs out straight with pointed toes</li> <li>• raise the arms and legs only slightly off the ground, moving up into streamline with the arms and shoulders, and making the spine as long as possible</li> <li>• hold for 3-4 seconds</li> <li>• do not over extend the lower back</li> </ul>		<ul style="list-style-type: none"> <li>• begin prone with arms extended above the head, head in neutral and legs out straight with pointed toes</li> <li>• raise the arms and legs only slightly off the ground, moving up into streamline with the arms and shoulders, and making the spine as long as possible</li> <li>• perform small movements up and down with opposing arm and leg while maintaining good body position</li> </ul>		<ul style="list-style-type: none"> <li>• begin in 4 point kneeling with hands under shoulders and knees under hips while maintaining a neutral head and lower back position, good scapular position, and keeping the abdominals activated</li> <li>• raise the right arm and leg to horizontal and straighten the left leg out</li> <li>• do not over extend the lower back</li> <li>• lower the arm and leg, and repeat on the opposite side</li> </ul>		<ul style="list-style-type: none"> <li>• begin lying prone with arms in the press up position</li> <li>• gently lift head and progressively push up into an extended position being careful not to just pivot in the low back</li> <li>• round the back onto the back, keep hands forward and drop chest between shoulders</li> <li>• return to prone</li> </ul>	
						Downward dog to upward dog	
						<ul style="list-style-type: none"> <li>• begin in 4 point kneeling with hands forward</li> <li>• lift knees up, try to straighten legs and drop head to the floor</li> <li>• keep the back in a strong position and push the chest toward the feet</li> <li>• lift the hips up, straightening the legs</li> <li>• press the shoulders up so the back goes into extension</li> <li>• return to 4 point kneel</li> </ul>
